MSN and MSN NP PROGRAM OUTCOMES

Master's Program Outcomes (Effective Fall 2024)
1. Synthesize and prioritize learning for clinical decision-making, policy development, and healthcare leadership.
2. Analyze population health perspectives in provision of safe, person-centered care of the optimal health outcome and well-being for diverse individual, families, communities, and populations.
3. Conduct scholarly inquiry using information technology to enhance evidence of information practice, education, research, and policy.
4. Perform quality improvement initiatives to enhance the effectiveness of healthcare, promoting a culture of continuous improvement.
